YOUTH FOR UNDERSTANDING
Hungary

Music year program

YFU Hungary provides an opportunity to study music on a high level in a **Professional Music High School**. These schools provide general education together with music education at an advanced level with subjects such as music theory, solfege, chamber music, music history, choir/orchestra, etc.

According to the national curriculum, personal **instrumental/vocal lessons** are given to every student, while **theoretical classes** are taught in groups.

It is a **wonderful, enlightening** but **hard working experience** that teaches each student how the Kodaly method works by seeing and learning it in practice. This opportunity could be a life changer as it is your chance to start your career as a professional musician.

In order to qualify for this special program, students must have studied music previously. For more information please contact your national YFU organization.

Are you ready to take the stage?
